Our Github: <https://github.com/Sale3054/SwiftRepo3308>

Our Deployed website: <https://dry-tor-23979.herokuapp.com/>

- Docs has all of the files for our website
- CGI-bin has all of our old python code for the original website structure
- Scripts has a few scripts for the deployment of our databases and its construction
- Login-system contains some original prototype code for localhost login to database
- To view our site, just click the link to the site. We managed to pull data from the API
  - Don't click the about-us button, you won't be able to navigate back.
